Athens Olympic Games Camera

British firms set to make a splash at Athens Olympics

Titech International and Envision Design Ltd have teamed up to take British expertise to this summer's Olympic Games in Athens, Greece. The two companies, both based in Aberdeen, have been awarded a contract to supply four underwater digital camera units to TV operators Camera Central UK.

Camera Central, based at Shapcote Film Studios near London, is to broadcast the digital footage of the Olympic events. The company supplies portable cameras, support systems and full-on production services to international broadcasters and provides comprehensive coverage of events such as the Olympic and Commonwealth Games and football.

The contract will give the two firms a "unique" opportunity to work with the BBC and European Championship. Envision Design, which has a long-standing relationship with the two companies, is pleased to have developed a specialist camera for this occasion. Envision Design said: "It is our hope that this exciting camera will mark the start of many more developments in this specialist field."

The Athens Olympic Games Camera was developed to house a Panasonic TV Camera in a watertight housing for any aquatic event. At the Olympics the cameras were mounted at the waters edge on the canoe course, capturing all the actions face to
